Resource Analysis

Our Platforms

We manage a Facebook page focused on health and nutrition, sharing regular educational content to encourage a healthy lifestyle. Our Instagram account delivers visually engaging content on healthy diets and exercises, while TikTok offers creative, short videos with workout tips to attract and engage a wide, younger audience.

Human Resources

Our team efficiently manages social media accounts by posting valuable content and engaging followers to boost interaction. We also create visually appealing designs, such as educational videos and nutritional charts, to guide the audience toward healthy habits. Additionally, we offer personalized nutritional advice and exercise plans to enhance customer experience and achieve positive results.

BUDGET

Analytical Tools

Google Analytics is a key tool for analyzing social media traffic and understanding customer behavior, tracking page visits, traffic sources, and content performance to support data-driven decisions.

Facebook and Instagram Insights offer precise metrics on engagement, including views, likes, comments, and shares, helping analyze the target audience and evaluate the effectiveness of marketing campaigns to improve performance and reach.

Financial Resources

Since the project operates solely online, there are no fixed operational costs like rent or fixed salaries. However, a monthly budget of 1000 EGP has been allocated to fund online advertising campaigns.

SWOT ANALYSIS

STRENGTH

- Affordable Pricing
- Weekly Follow-up
- Customized Content

WEAKNESS

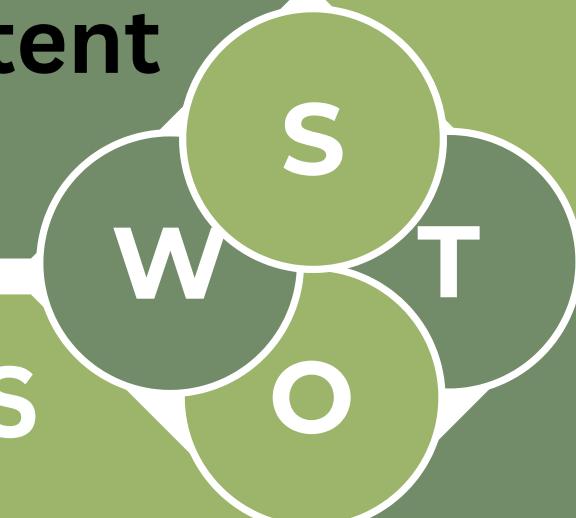

- No Physical Location
- Limited Trust

OPPORTUNITIES

- Health Awareness
- Timely Promotions
(Summer Specials)

THREATS

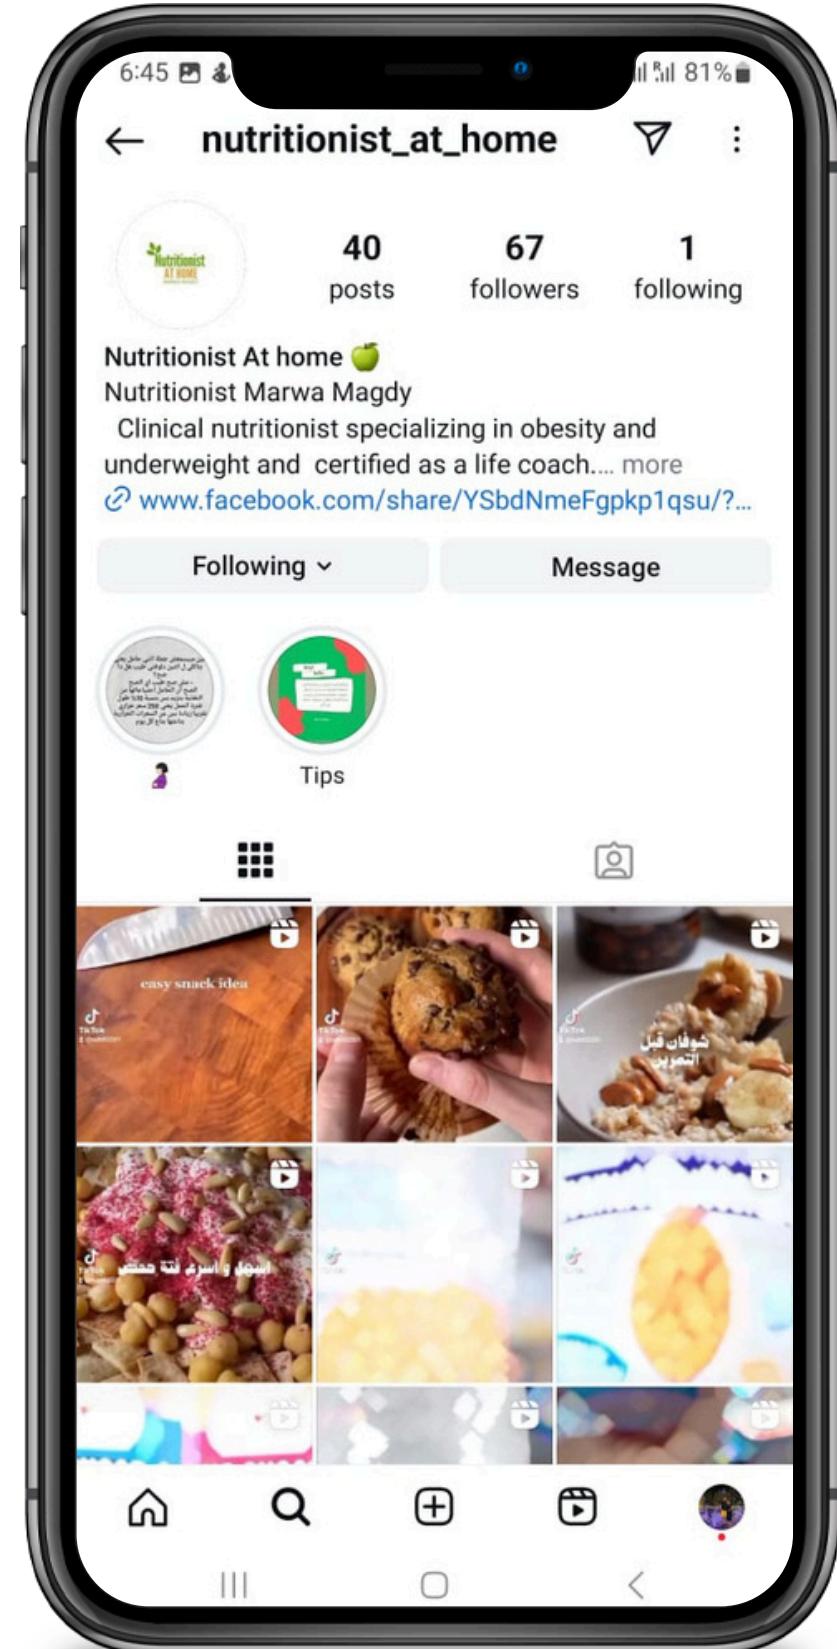

- Intense Competition
- Online Dependence

NUTRITIONIST AT HOME

FOUNDED 2024

Nutritionist at Home offers personalized nutrition services, providing tailored meal plans and expert guidance right to your door. We help you achieve your health goals from the comfort of your home.

4PS

PROMOTION

Promotional strategies include paid Facebook ads, engaging visual content on social media, and limited-time discounts on subscriptions to attract new clients. The target audience consists of women seeking solutions for obesity or underweight issues, favoring home workouts and personalized nutrition plans.

PLACE

Social media (Facebook, Instagram, TikTok) is used for content and client interaction, with consultations and services delivered online via messages and WhatsApp. This digital approach allows for wide geographical reach without a physical location.

PRODUT

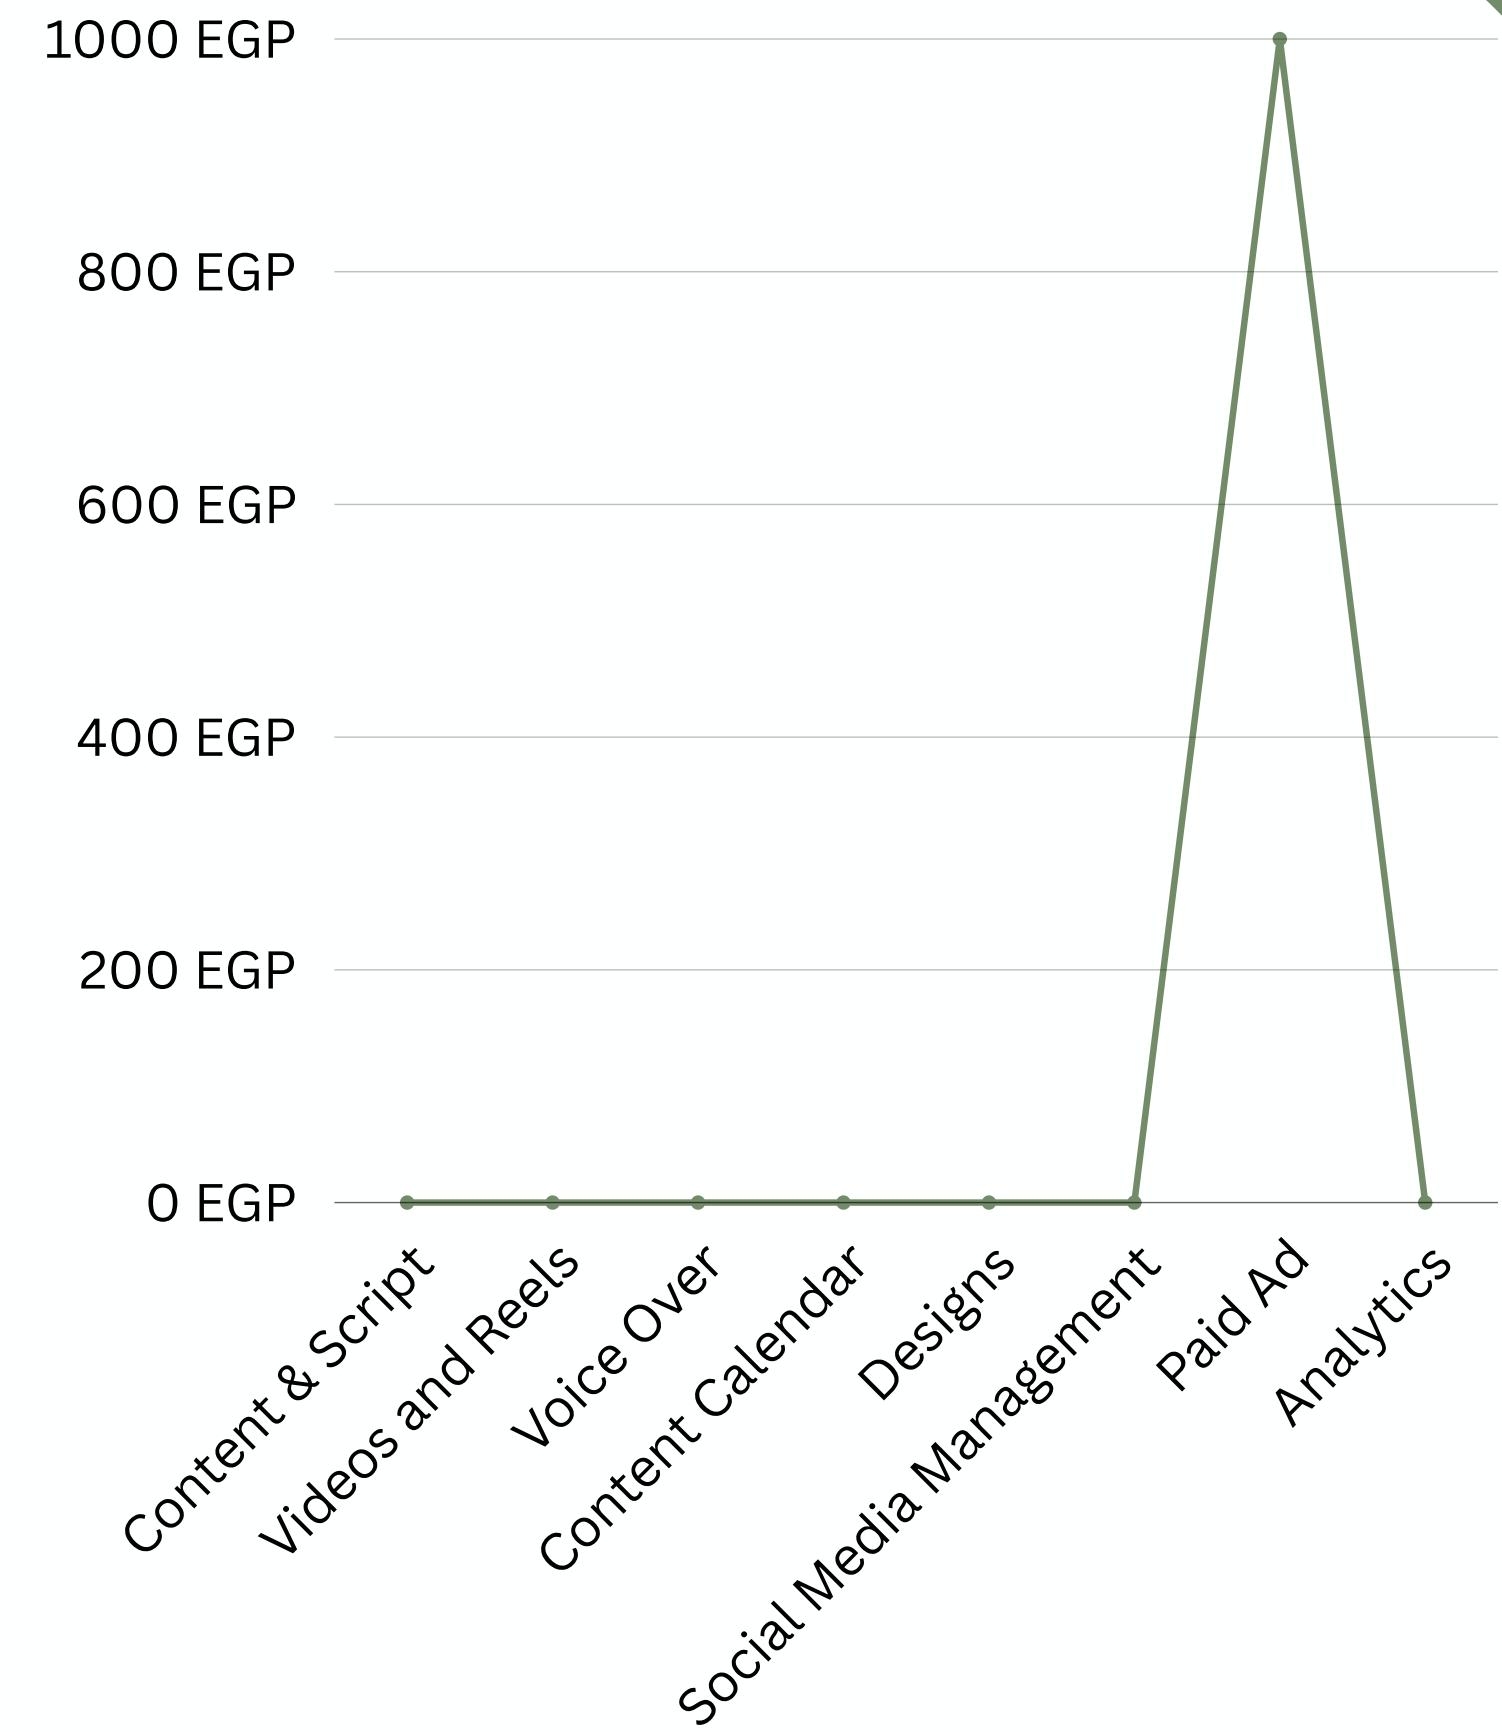

Customized nutritional programs, home workouts, personalized vitamins, and weekly follow-ups tailored to individual health needs. The service offers comprehensive support, enhancing client commitment and confidence.

PRICE

Flexible monthly subscription plans with competitive pricing for middle and upper classes, along with limited-time offers to attract new clients. The pricing strategy focuses on value-based pricing, ensuring prices reflect the quality and benefits of personalized services.

Reach

Facebook Results Paid Advertising

Our Facebook ads focus on promoting personalized nutrition plans and wellness consultations tailored to individual needs. In the first campaign, the results were weak due to targeting a small area, limited to Mansoura only. As a result, we closed that campaign and launched a new one targeting all of Egypt, which delivered significantly better results.

Key Strategies for Improvement

Content Improvements:

Create interactive content, share client success stories, and use quizzes to engage the audience

Advertising Enhancements:

Use targeted and content-driven ads, partner with influencers, and promote educational materials.

Pricing Strategy:

Offer subscription models, and provide discounts for referrals or long-term plans.

Offline Presence:

Establish locations in gyms or wellness centers, organize pop-up events, and optimize for local SEO.

Partnerships:

Collaborate with doctors and professionals in related fields like fitness and healthcare for cross-promotions and referrals.
